Commercial Equipment Brochure, Issue 6 - Coming Soon!

The next edition of our Commercial Equipment brochure is almost here.

With our digital version offering an interactive experience, issue 6 will showcase our top-performing lines from our extensive refrigeration, laundry, warewashing, and catering equipment ranges.

Containing more information than ever, this issue introduces our new category page feature, offering comprehensive knowledge about each range, making it easier to find what you are looking for.

Furthermore, expect thrilling new additions from renowned brands like Whirlpool, Sterling Pro, and Moffat.

Blue Badger Teams Up With Specifi Global

We are delighted to announce that Blue Badger Wholesale has teamed up with Specifi Global.

By harnessing the power of SP Organiser+, a robust PIM tool designed for manufacturers and suppliers in the foodservice equipment industry, we can take charge of our digital future and eliminate all inaccuracies in data, including pricing, specifications, man-

uals, or image updates, effortlessly and without any external intervention.

Additionally, with Specifi's incredible cloud-based system at our disposal, we can effortlessly generate custom-made quotes and POs, removing costly errors and time-consuming processes.

Foodservice Football Charity Match

Join us in supporting the Foodservice Football charity match and raise funds for Bowel Cancer UK.

This remarkable event, hosted by H2O Publishing at Bromley FC on the 22nd June, featured our very own MD, Mark Alexander, who donned his boots once again after years of retirement.

Brand Spotlight: Electrolux Professional Laundry Range

Electrolux Professional is a global leader in commercial laundry solutions. They offer an extensive range of reliable and efficient washers, dryers, ironers, and other laundry equipment designed to handle heavy loads and deliver excellent results in busy commercial settings.

With a strong focus on the needs of professional customers, Electrolux Professional's laundry range is renowned for its quality, innovation, and sustainability, making them a trusted brand in the commercial laundry equipment market worldwide.

Electrolux myPRO range: Is a smart solution for small businesses seeking robust washers and dryers that outperform standard domestic appliances, with a lifespan of over 7,500

cycles. Combining durability and affordability, this range is an ideal fit for various small operations, including small hotels, bed and breakfasts for guest use, out-of-home resident services, camping facilities, marinas, petrol stations, and student houses.

These washers and dryers are designed to excel in quality and longevity, lasting three times longer than domestic machines. With a diverse selection of professional programs, they ensure the best wash results and gentle garment care.

Not only do they deliver outstanding superior performance, but they also contribute to water, energy, and cost savings. The SpeedCare drum enhances dewatering efficiency, reducing cycle times and associated costs. Moreover, the Automatic Moisture Control in the drying cycle further optimizes energy consumption.

The myPRO range boasts an easy-to-clean Stainless Steel top and front, featuring a specially designed large door for added convenience. All these benefits come at a sensible budget, making it a practical choice for any small business.

To maximize floor space, the dryer can be stacked on top of the washer, offering a space-saving solution. The large 465mm robust pull-to-open door ensures easy loading and unloading for efficient laundry handling.

Electrolux myPRO^{XL} range: is a smart solution for small businesses that demand higher capacity and shorter cycle times, boasting a robust construction built to withstand over 15,000 cycles. This series features heavy-duty SKF bearings, a cast iron housing, and triple seals, ensuring extreme durability. Furthermore, it incorporates an 8-point spring suspension and premium steel counterweights for enhanced longevity.

In addition to its durability, the myPRO XL range is engineered with

water-saving capabilities, allowing adjustable water levels to promote efficiency. Its soft-mounted installation design with a pump drain further contributes to its water-saving features.

The machines are equipped with a highly effective shock absorbance system and optimally balanced components and panelling, ensuring smooth operation and minimal vibration during use.

For washers, the default time for the cold water program is 35 minutes, while the normal 60°C program only takes 73 minutes, utilizing 15°C cold and 55°C hot water inlet temperatures. The dryers are equally efficient, completing a full load in only

87 minutes and a half load in just 45 minutes.

Dedicated disinfection programs are integrated into the myPRO XL range to improve hygiene and cleanliness, catering to businesses that prioritize sanitization. For coin-operated machines, time-of-day promotional pricing features add flexibility and convenience.

Finally, the user-friendly interface offers easy-to-use push buttons for hassle-free program and option selection, ensuring a seamless laundry experience for small business owners and staff alike.
