Fama Food Prep & Cooking Equipment Brochure

Our new Fama Industrie Food Prep and Cooking Equipment brochure is now available to download.

In it's 65 year history, Fama has built up a strong reputation as one of the top manufacturers of food prep and cooking equipment in Europe. With products produced in their state-of-the-art factory in northern Italy, Fama ensure only the highest quality components are used, which combined with class-leading design, innovation and expertise, mean the end results is of the highest standard.

With Spare parts readily available in the UK, this Italian range is perfect for any professional kitchen or café.

Our range includes: Drink mixers, electric fryers, crepe makers, contact grills, conveyor toasters, veg prep machines, stick blenders, gravity feed slicers, meat mincers, mozzarella cutters and cheese graters.

Each unit includes a 1 year parts and labour warranty as standard. Available with free 1-2 working days delivery.

Contact your account manager or visit our website to find out more. 01264 333777 / sales@bluebadger.co.uk.

Brand Of The Month: Vestfrost

Established in 1963, Vestfrost have grown to become one of the leading manufacturers of storage refrigeration. From chest freezers to uprights, wine display to medical storage, Vestfrost's cabinets offer excellent reliability backed up with a 3 year parts and labour warranty.

Manufactured in their state-of-the-art factory in Denmark, the finished product offers the winning combination of quality, value and longevity.

Low energy: Unlike other electrical equipment, refrigerators and freezers are always in use and never unplugged. This makes energy efficiency that much more essential – especially when considering global focus on sustainability and rising electricity rates.

Vestfrost Solutions' eco-friendly and energy efficient product portfolio have limited impact on the environment. Furthermore, their customers

will benefit from low operating costs compared to market standards.

Long product lifetime: They have several stories from satisfied customers pleased with their 15-20 year old Vestfrost Solutions products, which are still going strong. A refrigerator or freezer made by Vestfrost is not just quality equipment, it is an investment for years.

A longer product lifetime gives you not only better value for money - the environmental impact is further significantly reduced due to lesser need of disposal of goods.

Quality tested: It's the small things that determine great quality. Did you know that all Vestfrost hinges are tested to open and close 400,000 times? Or the fact, that their products undergo climatic testing in high-tech facilities to be able to perform consistently in all regions of the

world? Just a few examples of how they work to deliver the best products for their customers.

Usability: Vestfrost products feature great usability and require limited or zero installation, ready to plug-in when delivered! The reliable and user-friendly solutions give you the freedom to focus on your core business. Just the way it should be.

CFKS471-WH White Upright Fridge, 361 Litres

- Size: W595 x D595 x H1850mm
- Refrigerant: R600a
- Shelves supplied: x6
- Exterior: Laminated white
- Interior: White ABS
- Temperature: +3°C to +10°C

M180 Upright Display Chiller, 381 Litres

- Size: W595 x D595 x H1850mm
- Refrigerant: R600a
- Shelves supplied: x6
- Exterior: Silver
- Energy efficiency rating: C
- Temperature: +3°C to +10°C

FZ365W-BLACK Dual-Zone Wine Cooler, 365 Litres

- Size: W595 x D595 x H1860mm
- Refrigerant: R600a
- Bottle capacity: 197 x 0.75L
- Exterior: Black/smoked-glass
- Wooden shelves: x6
- Temperature: +5°C to +22°C

Cost Of Living Crisis: Save Energy With Sterling Pro

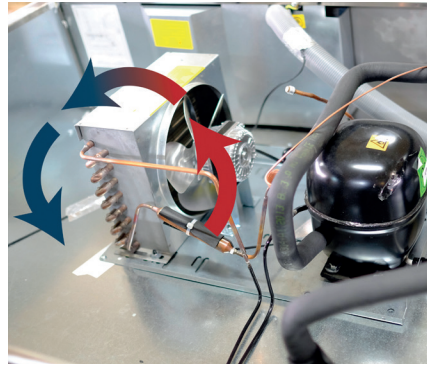

At Sterling Pro durability, affordability and reliability are at the forefront of everything they do.

In the current climate having reliable and efficient commercial equipment is more important than ever. With ever-rising energy bills for businesses and an increased strain on public spending the hospitality sector is once again going through another difficult spell following the recent pandemic.

Refrigeration appliances are unlike most others in that they are running 24/7, 365 days a year. This makes their energy consumption incredibly important to both the business and the environment. The Green range shows a 65% reduction in energy consumption against our standard range while still achieving the very best performance.

The lower operating temperature of the Hydrocarbon refrigerants creates lower heat and noise emissions, improving the comfort of the work place and extending the life of the compressor. Thought goes into every component with our new low energy compressors, large area evaporators and high

efficiency fans all working together to keep running costs to a minimum.

Sterling Pro always puts functionality at the forefront and so it is no surprise that our Green and Vantage ranges also improve usability. Their new

moulded shelf guides in the upright cabinets allow effortless sliding of the

nylon-coated shelves and make cleaning a simple process saving time and effort. Easy-fit magnetic gaskets on all cabinets & counters allow for effortless replacement, increasing hygiene and efficiency. A stamped bottom plate removes any chance for grease and dirt to collect, improving hygiene.

Our premium heavy duty Vantage range also adds to this with climate class 5 performance, upgraded insulation and natural hydrocarbon refrigerants; ensuring the units are ideal even for the most demanding environments. All the features and more you'd expect from a leading brand's premium cabinets.

See how our premium Vantage fridge cabinets compare with top market equivalents below.

Specifications	XPI700 Single Door Cabinet	Top Market Equivalent
Energy rating	A	A

Samsung Washer & Dryer Combo With Free Stacking Kit

Purchase our Samsung WF18T8000GV washer and DV16T8520BV dryer together and get a stacking kit worth £100+VAT absolutely FREE.

Samsung WF18T8000GV Washer:

With a huge 18kg capacity and stylish black caviar finish, the WF18T8000GV front loading washer features:

Eco Bubble™: Ecobubble™ technology is one of Samsung's brilliantly useful features designed to make laundry less of a chore. Mixing air, water and detergent it cleverly creates bubbles that wash your clothes at cooler temperatures, helping you to bring down your energy bills.

Hygiene Steam: Banishing the things you can see and those you can't (bacteria, pollen, dust mites and more) - The team is released upwards to make sure every last item gets a deep and even clean. The results? 99.9% of bacteria are obliterated and allergens inactivated. No pre-soaking, no hassle, no worries.

Drum Clean+: DrumClean+ helps keep the inside of your washer hygienically clean with a combination of soaking, pulsating and high speed spinning that removes 99.9% of odour causing bacteria from the drum.

Digital Inverter Technology: Here's a quiet washing machine that's built to last, has all the power you need, cuts down noise, and still uses less energy than a typical washing machine - so it's kinder on your wallet too. It's all

thanks to the Digital Inverter Technology ramping up the performance, not the noise.

Cycles: Eco 40-60, Cotton, Bedding, Heavy Duty, Intense Cold, Rinse + Spin, Wool/Delicates, Drum Clean+, Hygiene Steam, Quick Wash and Synthetics.

Samsung DV16T8520BV Dryer:

As well as boasting an impressive energy rating of A+++, the equally stylish 16kg DV16T8520BV heat pump dryer also features:

Hybrid Heat Pump Technology: Heat Pump Technology is the way forward for drying your laundry more efficiently. By reheating the air in the drum it's gentler on even the most delicate of delicates. And it means you'll use less electricity compared to a traditional condenser or vented tumble dryer, making it kinder on your bills and the environment too.

360 Airhole: Improves the air circulation and evenly distributes a large volume of air in every direction so it dries everything really effectively throughout the whole drum.

Reversible Door: Feel free to put your dryer where you want in your commercial or domestic environment. The reversible door lets you choose if it opens on the left or the right of the dryer - making it easy to load and unload your laundry.

3 Layered Filter System: Reduce dust on clothes and maintain the dryer in

the best condition with a 3 Layered Filter System. It captures the dust and fibres that come off drying clothes very effectively, twice with a 2-in-1 filter under the drum and a third time with a micro soft filter in front of the Heat Exchanger.

Cycles: Cool Air, Self Tub Dry, Towels, Cotton, Mixed Load, Synthetics, Quick Dry, Time Dry, Wool, Bedding, Delicates, Shirts and Hygiene Care+.

Employee Spotlight: Lewis Bewley (E-Commerce Executive)

Email: lewis@bluebadger.co.uk
LinkedIn: [Click here](#) to connect

After successfully completing his BTEC Level 3 Extended Diploma in IT, a fresh-faced Lewis joined Blue Badger in April, 2018. After expressing a keen interest in websites and data entry Lewis was given his first career role as our E-Commerce Assistant following a successful probation period.

Growing in confidence (and sarcasm) over the years Lewis is known as the go-to-guy for all things technical and now has the self-proclaimed title of

'Data Entry Whiz'. His quick learning skills along with a good eye for detail has helped him progress within the company to become our E-Commerce Executive and a highly valued member of the Blue Badger team.

An avid World of Warcraft player, Lewis loves Lasagne, holidays to Weymouth, Larping and enjoys watching The Lord of the Rings trilogy, Game of Thrones (excluding the last series) and Red Dwarf.
