## FFD 11469 BSV UK

### 6th Sense Washing Machine

Light-Duty Only

#### FFD 11469 BSV UK Main Features

Power supply: **13 amp plug**

Washer capacity: **11kg**

Drum volume: **71 Litres**

Product dimensions: **W595 x D605 x H850mm**

Maximum spin speed: **1400 RPM**

Programmes: **16**, including Steam Hygiene, Steam Refresh, Anti Allergy & Fresh Care+

Energy usage: **0.530 kWh/cycle** (Eco cycle)

Water usage: **54 Litres/cycle** (Eco cycle)

Water supply: **Cold fill only**

Spin speed options: **Variable**

**C00378975 stacking kit** sold separately

**1 Year Parts & Labour** warranty

**6th Sense Technology:** When it comes to laundry, saving energy matters. Whirlpool Professional products knows exactly how to do it, thanks to 6th Sense Technology that uses sensors, a flow meter and pressure switch to determine the exact load weight and adjust energy accordingly. In this way, the premium wash offers an outstanding and efficient cleaning performance with great savings: up to 45% of energy, on every wash.

**Warranty:** 1 Year Parts and Labour / **Delivery:** 2 to 3 working days

**Steam Hygiene:** Forget bacteria. Pure, perfect cleaning become effortless. When Steam Hygiene is activated, laundry get sanitized by a hot steam flow at the end of the cycle. Air at 70°C/80°C fills the drum for 30 minutes, neutralizing up to 99.9% of bacteria with no chemicals, in a powerful and natural way.

**Fresh Care+:** Unloading the washer the very moment the cycle is over is no longer essential to avoid bad odours and creases: Fresh Care+ takes care of both. Once the cycle is over, a steam flow is released inside the drum, gently massaging the load with several slow bidirectional oscillations. These combines actions keep clothes fresh inside the washer for up to 6 hours after the end of the cycle, preventing the proliferation of the main odour sources.

**Steam Refresh:** Steam Refresh regenerates the freshness of your garments, avoiding unnecessary washing. Clothes are ready to wear again in just 20 minutes. The washer generates a flow of steam that penetrates into the fibres, removing unpleasant smells, relaxing fibres and smoothing creases.

**Anti Allergy Cycle:** A special programme that eliminates all the detergent traces and 99.99% of pollens, house dust mites, pet hair, and much more. Ideal for environments that require high levels of cleanliness due to groups or individuals with high susceptibility to illness, for example: care homes and nursery schools.

**Inverter Motor:** Silent performance. Appliances with an inverter motor use fewer moving parts and therefore create less noise. The brushless technology enables the motor to turn by frictionless magnetic induction, ensuring a smoother, quieter and energy efficient operation.

| Main Features          |                     |
